

REDUCTION OF HEATING EXPENSES IN WINTER

USABLE IN ANY BUILDING

IDEAL DECORATIVE ELEMENT OF A BUILDING

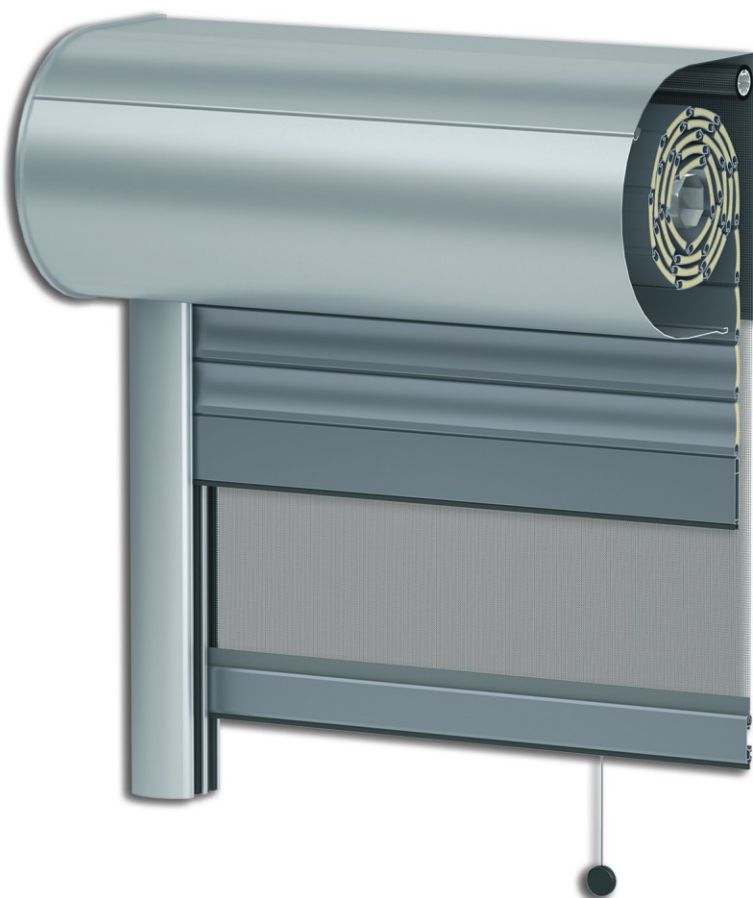

SK SKP SKO-P SKO

ROLLER SHUTTER ADAPTING SYSTEMS

■ Roller shutters in adapting systems are designed for use in existing buildings. thanks to broad colour range, they are an ideal decorative element, matching the buildings design.

■ Elements from a high quality aluminium sheet metal have an increased resistance to abrasion and weather conditions. The well-thought-out construction of the roller shutters and good selection of materials ensures effective protection against unwelcome guests.

■ Furthermore, they help make buildings sound proof and better insulated, lowering temperature in summer time and costs of heating during colder seasons. Using the independet Moskito system allows for a insect-free interior while allowing in daylight and air.
